

RING SIZER TOOL

by SIMPLICATED JEWELRY

METHOD 2:

cut & measure

scale check 10mm 1 Inch

1. Please print this, making sure your printer is set to A4 paper (210 x 297mm), 100% and “fit to page” is **unchecked**.
2. Measure the printed scale check with a ruler to be sure scaling is correct.
3. Cut out the ring sizer tool on the black and dotted line.
4. Slip the pointed end from the back and through the dotted line.
5. For an easier measurement first tighten the ring sizer then slip it on your finger. It should not be loose.
6. Note that the tool should wrap around your finger at its **widest** point and not at the base of the finger.
7. It is advised to double check this with at least one more method.
